Installation

Certified by different-major system suppliers in the industry, Landvist accommodates various clients and their green roof/rooftop project requirements.

Our trained crew ensures a quality / high performance installation during and after construction to deliver a headache-free project to the client and all the parties involved.

Learnt from years of experience in the green roof industry, Landvist knows how green roofs perform and what are do's and don'ts in order to make long-lasting installation for the client.

Maintenance

Whether maintenance is required as a part of green roof specification to meet warranty or it is a necessity to restore an underperforming / failed existing rooftop, Landvist offers its professional maintenance services and consultation to improve the project to its desired function.

Landvist provides resources and helps you to maintain and/or restore your green roof / rooftop project to enjoy and benefit the cost and time dedicated to this portion of your building.

Project Management & Consultation

Involvements in large-scale projects in Canada and U.S. and working with various parties such as TTC, NRC, etc. have enabled us to learn and offer effective communication, just-in-time delivery and waste reduction, quality control and commissioning process.

Landvist believes in sharing knowledge and experience and has built relationships with design community to collaborate on development of high-performance, cost-effective and low-maintenance rooftop projects.
